**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims -8, 13-20 and 22-26, drawn to an exposure apparatus, classified in class 430, subclass 296.
  - II. Claims 10-12, drawn to semiconductor process, classified in class 438, subclass 535.
  - III. Claim 9, drawn to an exposure method, classified in class 355, subclass 77.
  - IV. Claims 21 and 27, drawn to an error detection method, classified in class 356, subclass 124.
2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process. For example, the electron beam exposure apparatus can be used to evaporate metallic solids to form thin film coatings.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or IV, restriction for examination purposes as indicated is proper.
